SUPER

COOLER *Extreme*

Model
DSC60 *Extreme*

**One Compact
Assembly**

**2 Hydraulic
Fan Motors**

Thicker core

**Pressure Rated
to 3,000 PSI**

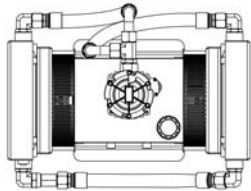

**Lightweight
Aluminum
Materials**

**Easy Mount
Rails**

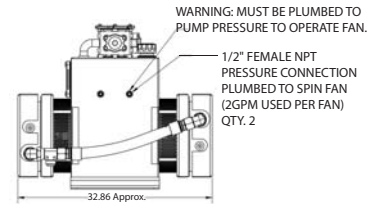

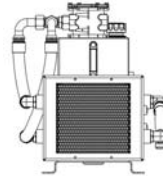

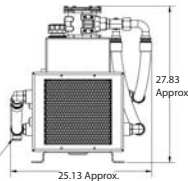

**For Systems
up to 60 GPM**

Features & Benefits of the DSC 60 Extreme

- The New DSC 60 **Extreme** is for the most demanding of your applications.
- The DSC 60 Super Cooler **Extreme** is a compact, lightweight, highly efficient hydraulic cooling system for the operation of high horsepower and high flow mobile hydraulic drive systems.
- The new **Extreme** allows continuous operation by controlling your systems oil temperature even in extreme temperature conditions.
- The DSC 60 **Extreme** gives you the capacity to drive the highest horsepower applications.

#20 MALE JIC
RETURN CONNECTION
QTY. 1

- DSC 60 **Extreme** cooler has two hydraulically driven fan motors for added heat removal
- DSC 60 **Extreme** cooler comes with a thicker core for greater heat removal.
- DSC 60 **Extreme** features a bowless style 10 micron element for optimum filtration
- Two 2" suction ports allows for the opportunity for a double pump to be plumbed to the reservoir.
- Aluminum Design gives the DSC 60 **Extreme** more heat dissipation and a lighter weight reservoir.
- Flow Control for hydraulic fan allows the fan to run at peak operation. No external device required.

Specs:

Flow Rate: 60 GPM
 Max Pressure: 3,000 PSI
 Reservoir: 8 gallons
 Weight: 82 lbs.
 Warranty: 1 year

Porting: #20 male JIC return connection x 1
 1/2" male NPT pressure connection to fan x 2
 3/4" male NPT drain connection x 1
 2" male NPT suction connection x 2
