Gates Power Crimp™ 707

This unit is the most precise, yet simplest crimper made. It was the first crimper with electronic digital readout to indicate gauge setting.

The toughest part about using the 707 is pushing a button. It takes just a few seconds to make factory-quality hose assemblies. Crimps most hydraulic hoses from low pressure return lines to extremely high pressure spirals, from 3/16” to 1-1/4” I.D. Crimps straight and bent tube couplings, plus 45° and 90° block types. Can also be adapted for use as a power swager.

**Production Rate:** 100 assemblies per hour (using 1/2” I.D. 2-wire straight thread assemblies).
